

COMINOX[®]
PURE STERILIZATION

SILVER WEDDING OF TECHNOLOGY AND DESIGN.

SILVERCLAVE

SPECIAL EDITION.

25 pieces for 25 years of excellence

Cominox concludes the celebration of its **25 years** by leaving a tangible sign of its history, something never achieved till now: SterilClave, an exclusive model of autoclave in a limited edition.

In Cominox the encounter between technology and design has produced, in a quarter century, innovative sterilizers, in an ideal synthesis between form and function that makes no compromises with quality. **SilverClave**, made in 25 copies only, as many life years of the company, is a tribute to a story born from a passion for perfection. And It celebrates, by its precious silver highlights, the dedication with which, always, Cominox manufactures its products.

The most beautiful ever made autoclave.

25 years deserved a prize. And the idea exceeds the traditional concept of sterilizer only useful as a tool by exploring the areas of aesthetics, of pure beauty. A typical concept of the **spirit Made in Italy**.

Hence the aim of achieving the most beautiful ever made autoclave, the most felt, the longer cared.

An object that elevates the mere function of sterilization to a true expression of quality and beauty all together. **SilverClave** born, with its prestigious livery "Silver" satin silver effect, with the emotion that only this color may give to objects of great design.

Each SilverClave is cured by hand with the help of bodywork **Carrozzeria Viscardi** placed in Varese, specialized in high quality finishing and customization for big brands in the automotive sector since 1955. The effect of the silver surface was obtained through a process very thorough. To ensure the quality of the application and its estate a base metal very sophisticated and valuable paint was used. The end result is extraordinary, for a model which has no comparison in the market. A single model, made in **twenty-five numbered copies**. A special edition, as the competence and commitment demonstrated by Cominox in **25 years of history**.

COMINOX[®]
PURE STERILIZATION

SilverClave is a unique design, but not limited to: designed in perfect harmony with the Cominox' philosophy, it carries 25 years of technology innovation and performance in line with the highest standards. The device is able to perform **sterilization cycles EN 13060 type B, S and N** and to meet all technical requirements of the user. A **large screen** easily shows the processing of reading and the ease of using is guaranteed by the possibility to have a **programmed starting** of the sterilizers. The loading of water can be done **manually** or **automatically**, with maximum reliability.
